

C45

Audio Control Center

NEW

Promotional Highlights

The C45 Audio Control Center was designed for the music lover. Ultra-short signal paths in conjunction with state-of-the-art silent electro-magnetic switching has virtually eliminated preamp noise. The C45 also includes a high performance phono input for your turntable. Dual Six-channel inputs allow control of the latest multi-channel audio formats when used with source components that provide the decoding. These multi-channel formants include DVD-Audio, SACD, Dolby Digital and DTS Audio/Video.

Performance Features:

Two 6-Channel Inputs: Provides multi-channel audio control for source units, such as DVD players, with built-in decoders. Each 6-channel input is assignable to any of the eight source inputs.

2-Stage Electronic Volume Control: Volume for each of the six channels is controlled by an individual 2-stage circuit to maximize dynamic range. The precision optical encoder uses pulses of light to ensure accuracy and to eliminate mechanical wear.

Information Display: The large, easy to read display shows input and volume. Input names can be chosen from 14 available titles.

Assignable Balanced Input: May be assigned to any source input, including the front L&R channels of either 6-channel input.

Balanced Outputs: 6 balanced outputs may be mixed with any of the 6 unbalanced outputs for any system configuration.

Ultra Quiet, Precision Phono Section: Record lovers have not been forgotten. The built-in moving-magnet (MM) phono section is quiet and has precise response.

Tone Control Bypass: In addition to bass and treble controls that individually switch out of circuit when centered, the entire circuit may be bypassed

Input Level Trimming: Set the levels of each of the inputs for more consistent volume when switching between inputs.

Add a TM-1 AM/FM Tuner Module Inside: With a TM-1 module added, the C45 becomes a Tuner/Preamplifier. FM performance is top-notch, and the AM, with the included powered AM antenna, is amazing.

Fiber-Optic Front Panel Illumination: Cool-running, long-lasting fiber optics illuminate the front panel.

MSRP: \$3,600
